

MANAGED BY  
DELPRO™  
FARM  
MANAGER

# Get the full picture of your cows' health and heat status

The DeLaval activity meter system works together with DelPro Farm Manager to ensure breeding success and monitor the health of your herd. Thanks to the new repeater network the system can now be used on large scale pasture as well as in the barn.

## Key features and benefits

- Detects heat with up to 95% accuracy
- Improves conception rates
- Detects silent heat
- Detects potential illness at an early stage
- Identifies low activity cows
- Reaches up to 3 km into the pasture land
